

Claim Amendments:

This listing of claims will replace all prior versions, and listings, of claims in the application:

1. (Previously Presented) A coiled air brake tubing comprising a laminated tube said tube having an innermost layer of nylon, an intermediate layer of a polyurethane and an outermost layer of nylon wherein said tubing is set in a coiled configuration, and said outermost layer is in direct contact with an entire surface of a next adjacent inner layer.
2. (Previously Presented) The coiled tubing claimed in claim 1 wherein said polyurethane is selected from the group consisting of polyether polyurethane and polyester polyurethane.
3. (Original) The coiled tubing claimed in claim 1 further comprising a fiber reinforcing layer within said polyurethane layer.
4. (Original) The coiled tubing claimed in claim 3 wherein said fiber layer is a polyester layer.
5. (Original) The coiled tubing claimed in claim 3 wherein said fiber reinforcing layer includes three to six pics per inch.
6. (Original) The coiled tubing claimed in claim 1 wherein said innermost layer of nylon is from about 2 to about 5 mills.
7. (Previously Presented) The coiled tubing claimed in claim 1 wherein said nylon layers are selected from the group consisting of nylon 6, nylon 11 and nylon 12 and alloys thereof.
8. (Previously Presented) The coiled tubing claimed in claim 1 wherein said polyurethane layer is a polyether polyurethane.

9. (Original) The coiled tubing claimed in claim 8 wherein said polyurethane has a hardness of 80A-63D.

10. (Withdrawn) The method of forming a coiled laminated air brake tubing comprising:
co-extruding an innermost nylon layer and a first polyurethane layer;
forming a fiber reinforcing layer over said first polyurethane layer;
applying a solvent to said first polyurethane layer;
extruding a second polyurethane layer over said fiber reinforcing layer and said first
polyurethane layer; and
extruding an outermost nylon layer over said second polyurethane layer.

11. (Withdrawn) The method claimed in claim 10 wherein said solvent is selected from the group consisting of N-methyl pyrrolidone and diemethyl formamide.
